Customer Reviews

My daughter scored high on the chemistry test and this book was a great addition to other study tools. It is important to get an up to date version so that the student will be reviewing the most current selection of questions. She used the book and a study group of other friends who were taking the test. I believe that it is important to purchase a book that you can later resell. This is my last child in high school and now I can recycle this book for others. My daughter liked the diagrams and practice tests. This book is a winner!

This book is good for people who know absolutely nothing. If you are planning to seriously study, save your money and don't get this book. I ended up using my ap prep book more than I learned from/used this. Once again way too brief.

Crash course does a great job of teaching a lot in fewer pages than normal SAT books, especially science ones like this, and is good if you are looking for something to use close to the exam
