Customer Reviews

I was in a pretty severe accident about 10 months prior to purchasing this book. I had been t-boned by a motorcyclist speeding excessively. I sustained six broken ribs, fluid in the lungs, an injured spleen, and more. It took 4 months to recover, and the experience was excruciatingly terrible on so many levels. Like the author here, I am a lifelong athlete. I played competitive sports like Ice Hockey, and I made a career of my love for sports by teaching physical education. I also lived in Greece for a couple years when I was young, so I can relate to the lovely weather and ability it provides for an active lifestyle. So when I found out what this book was about and the story of the author, I knew I had to read it as I was struggling to get back on my feet and back to exercising. The courage it must have taken for the author to write this is unreal. The sheer detail of the accident and recovery is mind numbing. I was captivated as I read the story, and I felt like I was there. But the way he persevered and decided to move forward is inspiring. Having been through a life altering accident myself, his courage gave me some courage and made me feel not alone. Then to read about the project he created to help people be healthy was even more inspiring. Here is a guy who could have drowned in his sorrows, and he decided to turn it into a positive. By the time I got to the portions on exercise, I already felt I was in trusting hands. The layout of the book is great. The way the chapters build on each other lets you slowly understand the points being made. Each idea builds on the next. Also the thoroughness of the information is amazing. For example, the section on the gym vs. home workouts makes the case for home so well.
