Energy Studies (3rd Edition)

Synopsis

How is the future world energy demand to be met? The rates of use of the fossil fuels – coal, oil and natural gas – are increasing all over the world. The remaining stocks are finite and are not renewable. This book considers the various options of renewable energy, including water energy, wind energy and biomass, solar thermal and solar photovoltaic energy. And should the nuclear option remain open? The work also examines the environmental implications and economic viability of all fossil and renewable sources, introduces more distant future options of geothermal energy and nuclear fusion, and discusses a near-future energy strategy. Readership: Undergraduates, graduate students and researchers in energy research and environmental education.

Book Information

Hardcover: 556 pages

Publisher: Imperial College Press; 3 edition (May 20, 2014)

Language: English

ISBN-10: 1848168500

ISBN-13: 978-1848168503

Product Dimensions: 6.7 x 1.4 x 9.9 inches

Shipping Weight: 2.3 pounds (View shipping rates and policies)
