## Customer Reviews

This is a good basic cursive book. It goes through each letter and does have the arrows to indicate the direction of movement. It also does various letter combinations and connections.

I was expecting a full-sized workbook for my child, so I was a little disappointed with the smaller size of this. I think it will make it harder for my son to write on. The book is ok but I wouldn't buy again.

I am a international student, just because my professor write cursive writing on the class, so I bought this book to study. Now I can write a good cursive word and exactly know what professor write on the blackboard.

I have a ten-year-old student who is embarassed that he never learned cursive writing. With this little, inexpensive book and some supervision, he is finally learning!

Well-organized, easy to understand book. Has a progress chart and stickers inside which helped my

child stay motivated to work through it. Lessons are short and well-explained. Will buy for my younger children when they are ready to learn cursive.

wonderful book. Our schools located here are not teaching cursive writing any longer. So I thought this would be a great starter and work book for my daughter - and it is

I bought this for my son to work on over the summer since schools in TX have decided not to teach cursive anymore. I have no idea why except that the state would rather force teachers to spend 90% of the year teaching kids to take tests than to help them write nicely and read historical documents. Regardless, this little workbook is a great way for your child to self-teach a useful skill and makes for a nice break between rounds of marathon Minecraft building, lol. The lessons are clear, give them adequate opportunity to practice, and help them with connecting and letter formation.

My 8 year old twins are working through this book right now and are really enjoying it! They are going into third grade next year and are at the perfect age and skill level to be able to successfully learn and improve their cursive skills! Highly recommend this book! I love that there are arrows with each letter to show how it is to be written properly. My kids love the reward stickers (great incentive for each day)! :)
