LOW EARTH FREQUENCIES: Universal Cure To All Brain Diseases (A New Era Of Knowledge Book 2)

Synopsis

Low Earth Frequencies - New neurotechnology Effects of these frequencies on human brain
The purpose of Radovan Babicâ€™s second scientific publication is to cast a fresh light on problems concerning the human brain - the most powerful computer in the world. In this book he describes the new healing bio-neurotechnology which is capable of healing all existing brain diseases & disorders. The information in this fascinating & revealing book is based on scientific research fully supported by bibliography. Book explains: The original knowledge about the human brain going as far back as ancient Egypt The human brain as the most powerful computer in the world same as the purpose of the photosensitive organ Pineal Gland Advanced brain functions such as Telepathy, Astral projections/Out of body experiences (OBEs) Ability of the brain to heal itself without need of any drugs or medications Natural healing of brain due to the Bioresonance phenomenon of the same low brain & Earth frequencies same as by sound & colours

Bioresonance Bioresonance is an electrotechnical phenomenon where we understand the same frequencies from the human brain and healing bio-neurotechnology. Due to these frequencies the organs and cells of the human brain work at their maximum performance which speeds up and enforces self-healing and the self-regenerating processes of human brain. What else is in this book Publication is also unique as it includes Radovanâ€™s own invention of new neurotechnology of Earth frequencies same as his own experiences and wisdom. It also contains the unique 3d models created by professionals within Radovan's team same as illustrations for you to be able to visualise & imagine described aspects better. Telepathy and Pineal Gland are important aspects explained in this publication where they are explained by science in way that Radovan compares it to technology of light signal transmission. As Pineal Gland organ is highly photosensitive, Radovan and many others believe that it is this organ which allows us to develop once again - long forgotten - abilities. It is light signal transmission which allows telepathy on long distances. This publication also scientifically explains another higher brain function beside telepathy - Astral projections /Out of body experiences/OBEs. This is possible by organ The Pineal Gland which also produces hallucinogenic hormone DMT also known as "Molecule of God" which deeply supports dreams, visions and visualisations. Author & his personal note it is not surprise that Radovan managed to gain qualification from astral projections (BSY group UK) which again supports whole research and publication itself alongside with his practical experiences with astral travels. This publication is also supported by Radovanâ€™s qualifications in fields such as EEG - Biofeedback level 1 in EEG institute, Prague same as Parapsychology (BSY group UK), which beside many fields covers fields such as ESP - extrasensory perception, telepathy & our Third

Eye-Pineal Gland organ positioned on our 6th Chakra â•" The intuition Chakra/The Third Eye Chakra. "I would like personally welcome you to this new era of knowledge. This wisdom is presented to you by the Biohealing project with me as its founder. It is the era where lot of kinds of abnormal behaviour, brain disorders and diseases are not considered as negative aspect, but are considered as abilities/higher brain functions which can be directed for individualâ™s personal prosperity to develop your potential. One such aspect is new technology described in this publication. This technology is my own invention and I am willing to give it all its technical details to you & to the world." Customer Reviews

This is second publication I have purchased and read from this author. After experience with first publication I knew that I would found interesting information here too - mainly information and wisdom which scientifically explains some few unexplained phenomena. In this publication author is focusing on human brain and its work from electrotechnical point of view. I found very interesting topic about dreams. I was surprised when I read about the technology that we can actually show

human dreams and thoughts on screen which author describes into detailed way. This technology is however not Radovanâ€™s and he is referring this concept to its original inventor - Nicola Tesla. However this makes relevant addition to this publication and is also referred to detailed bibliography should you be interested into more details. Author also talks about telepathy which he also explains from electrotechnical point of view, mainly comparison to the light signal transmission technology via laser. I found very fascinating and greatly graphically processed the technology of the chamber underneath earth surface. According Radovan this technology is capable to harness low frequencies of Earth which can be then used to heal brain diseases should such a person would stay in that chamber. I found technology profound and 3d models of this technology in high quality. They not only replace many words but also support visual stimulation of the reader to enhance his imagination and visualisation of such technology. I would recommend this publication to people who are interested topics such as altered mind states, higher brain functions and capacities same as low Earth frequencies. This publication is also good bridge connection between conventional medicine and alternative medicine and their combined use.
