Customer Reviews

I was initially quite worried about the selection of this book because many SAT books made from organisations other than College Board usually fail to pursue the format of the text. But this book exactly corresponds the format, style and type of questions and texts that are encountered in the actual exam. Really glad to prepare for the new SAT with this book and I recommend this to everyone who is really concerned with the accomplishing of the highest score.

I like this series of books. The passages are sufficiently rigorous and the questions are comparable to the real test. The answer explanations are online, which is an extra step, but it keeps the book slim and easily portable, so I don't have a problem with that. I use this book with SAT students as well as with any of my struggling high school readers.

Brilliant book, similar to real test. It includes 10 tests, that is the best part of this book. Each and every question are well written and pretty much the same format as the real test.

Answer key does not explain why!

Works for my kids!
