The Face of the Future is an excellent guide to staying ahead of the aging process. What I found particularly interesting was reading about the science of what makes one "beautiful". Non invasive (including injectable treatments, laser procedures, as well supplementation) and invasive procedures (such as surgery) are both addressed giving the reader a great sense of what is available in the world of facial enhancement. I would definitely recommend this book to anyone curious about what their options are for staying youthful and attractive.

Dr. Jacono is an amazingly talented doctor who has found innovative ways to enhance naturally with different techniques and options available to all. For those who don't want evasive surgery and

just need an enhancement with surgery Dr. Jacono has found ways to work with all different types of people and situations. Having personally undergone plastic surgery by Dr. Jacono I would highly recommend his talent and his techniques. His work is his passion and he truly aims to please and takes his work personally and is a perfectionist. This book gives insight and describes all options. Anyone who is thinking or interested to learn about new innovative techniques to help enhance and beautify should read this book. Most people have no clue about what plastic surgery is really about or there options, this book will enlighten them.

If one is considering any type of non-surgical or surgical procedures of the face this is a must read. It discusses all treatments from skin care products to fillers to plastic surgery in very easy terms to understand with photos. It is very educational.
