Customer Reviews

Used this in college, and now that I work in a hospital. Its just great. I have several different charts, and I would buy them again--I probably will when they update them. It just snaps into a 3 ring binder, and I dont worry about something getting spilled on it. This saved me ALOT of time when taking notes for a chapter.

Love these...I am buying all in the series, faster reference than online searching, more effective in rapid memorization due to graphics.

I just wish I had ordered these before taking my Medical Assisting Course. They are perfect for quick references and because they are laminated they will last and can be used at the place of employment. I acquired them to assist me in preparing for my certification test that is coming up pretty quick. I am very pleased with the product.

Out of the 5 "Quick Study Guides" I purchased, this is by far the most go-to one that I have used for coding purposes. I love them all, but I have used this one the most for classwork and homework. It

is easy to use and has lots of helpful information. I would definitely recommend this for people who are not familiar with medical abbreviations and acronyms. This will be an valuable asset to you.

Medical Abbreviations is good to know not only in medical but also for personal use since many patients go to see their doctors and ever wondering what are thoose codes written in ther lab sheets for lab testes. In my personal view this is good to have it with you so like that you could remember the abbreviations while you're not in college.

This is a useful tool when studying for any pharmacy job. If you wanted to, you could even make flash cards with the knowledge here and help quiz yourself to memorize the info. It arrived on time and comes laminated. It is also very sturdy. The only issue I have with it is that it is a little tall. It doesn't seem to fit in my folders very well but since it's sturdy on it's own, it is still simple to travel with as long as you have a knapsack or binder tall enough to fit it in.

Purchased this as a quick referral guide for current and upcoming classes. This is laid out well, laminated, and so far I have found it useful.I purchased 5 of these inserts: Medical Terminology, Medical Abbreviations & Acronyms, E/M codes, Anatomy, and Physiology. I am moving into a new career field. So far these balance out my textbooks quite nicely. Most of them will also be useful on the job itself.

This has been a great help in nursing school. I put it in the front of my binder so that it is available for every class. It's great for helping to memorize abreviations and acronyms for diagnostics, designations, managed care, assessment, body systems, and pharmacology.
